

MyQ Printing Solution

MyQ Embedded Terminal Layout

MyQ offers unique features to personalize device terminal for each user or user group. Immediately after the users authorize themselves the device screen shows only the icons available for the user. Everything is set-up by the administrator on the MyQ server.

Please see list of possible icons that can be enabled on the terminal.

Print All	Manual for installation and setting of most of MyQ® main functions. It covers software installation, search of print devices, manual adding of users and creation of print queues, assignment of terminals to print devices, setting of printer drivers and running most of MyQ features.
My Jobs	Enables to see and manage (print, delete, add to favorites, remove from favorites...) list of all user's jobs sent to a printer .
Easy Scan	One tap scanning. After the user taps this action, the page is immediately scanned to a predefined folder or email. You can define multiple folders or emails to which the scanned document is sent, and set the scan parameters in MyQ.
<ul style="list-style-type: none"> - Email - Folder - Shared folder - Cloud 	
Easy Copy	One tap copying. After the user taps this action, the page is immediately copied. You can define the copy parameters in MyQ.
Easy Fax	Two steps faxing. You can define the fax parameters in MyQ
Application	Button for direct access to 3rd party HyPAS applications from MyQ menu.
Application list	Displays a list of 3rd party HyPAS applications.
Unlock Panel	Unlocks the printing device panel and opens the default screen.
Panel Copy	Opens the printing device copy screen.

Panel Scan	Opens the printing device scan screen.
Panel Fax	Opens the printing device fax screen.
Panel Box	Opens the printing device document box screen.
Panel USB	Shows files stored on USB drive.
ID Card Registration	After tapping this action, the ID Card registration screen opens and the logged user can register his or her card by swiping it at a card reader.
Edit Account	By tapping this action, the logged user can open his or her user profile screen, where he / she can change full name, email and default language. After the change is submitted, the database entry is changed and the new values are set. The changes are applied next time the user logs in.
Folder	Actions can be put into folders. Folders can be used to optimize layout of the terminal screen or to enable users to access higher number of actions. For example, you can place multiple Easy Scan actions with different destinations under one Easy Scan folder or leave just a few most important actions on the home screen and place the rest into an additional actions folder.

The set-up is done by MyQ administrator via MyQ web UI. For more information on how to set-up embedded terminal please refer to "MyQ embedded terminal manual" or contact us at info@myq-solution.com
